

## **PRESS INFORMATION FOR IMMEDIATE RELEASE**

**25-03-2009**

### **POLETECH SYSTEMS LTD AT TRAFFEX 2009**

#### **Products Promoting & Exhibiting**

Poletech Systems Limited will be exhibiting and promoting their range of Road Traffic Management Systems including: Demountable Permanent Underground Foundation bases for traffic signs, traffic signals, street lighting and street furniture. Underground Modular Access Chambers ( MAC and MULTIMAC ) for cable access, retractable and folding Power Distribution Chambers, delivering connections to electrical, telecommunication, data, signal or water services. Poletech's Passively Safe Break-Away PolePlug and Cable System that is working independently and hand in hand with the Poletech LineGard GFCI ( Ground Fault Circuit Interrupter ), designed specifically to mitigate shock and electrocution of those who may come into contact with Passively Safe Break-Away poles.

#### **New product launch!!!**

Poletech Systems in partnership with Sogexi, introduces to Traffex 2009 Dimming and Remote Monitoring for Street Lighting networks. By using the Tegis™ the Intelligent Lighting Management software system, helps to ensure the network security and maintenance of the network, and offers additional energy savings of up to 50% through localised dimming.

Tegis not only provides reduced energy usage, the system can considerably lower CO2 emissions and the equipment can be provided with Energy Saving Certificates.

The Tegis Lighting Management System conforms fully with the European Standard for Street Lighting EN 13201 and so this launch is a MUST-SEE for public sector, lighting and electrical engineers, designers, consultants and in fact anyone within Street and Road Management.
